F3	VTG21F3	VTG25F3	300-350RPM	2.6N
Assorted	VTG21AI	VTG25AI	300-350RPM	2.6N

GUIDELINES FOR USE:

- * V-TAPER™ GOLD files are compatible with all major rotary motors in the market.
- * Explore the canal by using #10 stainless steel hand files
- * Use **SX** to open canal, setup a straight path
- * Irrigate, then expand a glide path by **PATH FILE #16**.
- * Use **SI** to prepare to **3mm or 4mm SHORTER** than the working length. (even shorter)
- * Use **S2** to prepare to working length
- * According to the preparation status, to choose use **F1-F3** to prepare to working length

Everytime you change file, please ensure irrigate the root canal copiously and frequently with a lubricants, such as EDTA. (very important!!)
